

Polyethylene Treated Powders

Polyethylene Treated Powders

Polyethylene을 처리한 파우더이며, 친유성 표면 특성으로 인해 오일에서 좋은 분산성을 제공합니다. oil cakes와 다른 oil 분산 타입제품에 적용할 수 있습니다.

Product name	INCI NAME	CAS No.	Average Primary Particle Size (μm)	Characteristics
PLASTIC POWDER AP-18K	Polymethyl Methacrylate, Polyethylene	9011-14-79002-88-4	5~20	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Provides good spreadability and elegant feel.
TiO2 AP-12K	Titanium Dioxide, Polyethylene	13463-67-79002-88-4	0.2~0.4	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Provides good spreadability and elegant feel.
Talc LP-12K	Talc, Polyethylene	14807-96-69002-88-4	7~10	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Can be used as basic functional powder in the preparation
Black NP-18K	Black Iron Oxide, Polyethylene	1309-38-29002-88-4	0.2~0.6	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Can be used as basic functional powder in the preparation
Red AFP-18K	Iron Oxides, Polyethylene	1309-37-19002-88-4	0.05~0.4	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Can be used as basic functional powder in the preparation
Yellow RP-18K	Iron Oxides, Polyethylene	51274-00-19002-88-4	0.05~0.4	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Can be used as basic functional powder in the preparation
Nylon Powder AP-18K	Nylon-12, Polyethylene	25038-74-89002-88-4	8~12	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Provides good spreadability and elegant feel.
Mica HP-18K	Mica, Polyethylene	12001-26-29002-88-4	24~28	Powder with lipophilic surface properties. Improved dispersability. For oil cakes and other oil dispersion type products. Can be used as basic functional powder in the preparation.
