

INFORMATION REQUIRED WHEN ORDERING

For perfect service, and to insure that the pumps will be the most suitable for particular operations, the following information is required.

1. Total head, suction lift and discharge head.
2. Capacity.
3. NPSH available.
4. Name and composition of liquid.
5. Temperature of liquid, specific gravity and viscosity of liquid.
6. Vapor pressure of liquid.
7. Characteristics of suspended solids if applicable.
8. Percent of solid content by weight, specific gravity of solid, particle size of solid in micron or screen size and abrasiveness of solid.
9. Viscosity of liquid.
10. Motor: To be furnished by NGK or by you.
11. Characteristics of electric power: frequency, number of phases, voltage.
